

OVEN

Tools Needed

- Clean Towels
- Utility Bucket
- Non-Abrasive Pad
- Eye Protection
- Oven Mitts
- Rubber Apron
- Rubber Gloves

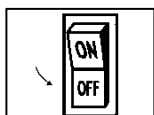

Product Needed

DCT Oven Cleaner

FREQUENCY OF CLEANING: Weekly.

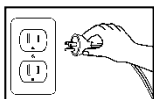

SPECIAL DIRECTIONS FOR THIS TASK: Wear hand, body and eye protection.

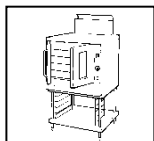

STEP 1

- Turn oven off, and let cool for 45 minutes.

NOTE: For ovens equipped with cool-down mode, place blower switch in cool-down position and let cool for 45 minutes.

- Unplug oven from electrical outlet. If outlet is not accessible, turn power off at circuit breaker.
- Turn on overhead exhaust fans.

STEP 2

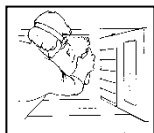

- Put on oven mitts.
- Remove all oven racks, and take them to the 3-compartment sink to be cleaned.
- Remove any aluminum foil from the fan guard.
- Remove oven mitts.

STEP 3

- Place foaming sprayer onto DCT Oven Cleaner bottle and tighten until snug.

NOTE: Put on eye protection, rubber gloves, and rubber apron for Steps 4–6.

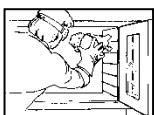

STEP 4

- Foam DCT Oven Cleaner onto all interior and exterior oven surfaces including doors.

NOTE: DCT Oven Cleaner is most effective when applied while oven surfaces are still warm (130°–150°F).

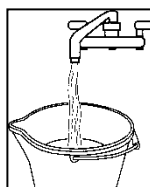

- Let soak for 5–10 minutes.

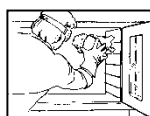

STEP 5

- Scrub surfaces with non-abrasive pad to loosen soil.

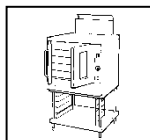

STEP 6

- Fill a clean utility bucket with warm rinse water, and place a clean towel into the utility bucket.
- Carry utility bucket to the location of the oven.

STEP 7

- Using the clean towel in the utility bucket, wipe oven surfaces to pick up loosened soil.
- When towel becomes heavily soiled, rinse it thoroughly in the utility bucket.
- Repeat process until all residues are removed.

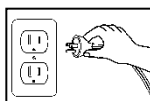

STEP 8

- Replace oven racks.

STEP 9

- Wipe down the inside and the outside of the glass doors with clean water.

STEP 10

- Plug the oven into the electrical outlet.
- If the circuit breaker was turned off, turn it back on.

STEP 11

- Remove protective equipment.
- Wash hands before returning to service area.
