P&G products create safer work environments and save money

Our dilution control packaging:

- Reduces employee contact with concentrated cleaners, improving safety and lowering risk of accidental splash
- Reduces gugging, which lowers in-use cost
- Easy-to-use system allows only the right color and size cap to work with the matching product

Cascade Professional™ dish machine portfolio provides unbeatable clean in any machine or water conditions

Get exceptional shine from your dish machine - every time and without the extra work

After three months (700 washes)*, glass and flatware still shine with **no** polishing on glassware and silverware.

After 1,300 washes with no deliming, the difference in limescale build-up is significant.

Advanced ProShine™ technology

Cascade Professional™ with ProShine technology contains limescale-fighting agents that help prevent the attachment of calcium to the surfaces of your wares and machine. Instead of calcium turning into filming and cloudiness, it gets washed away.

With Cascade Professional™ you:

Save money –

- \$1,700 in average annual savings** from rewashing and deliming (\$800 in hard savings & \$900 in labor savings)
- Additional labor savings from polishing

Optimize your operation – Keep your machine clean and efficient while **doubling** the time between deliming

*in medium water hardness
**based on 300 racks/day

Cascade Professional™ delivers true breakthrough results and operational savings
