# WHY CLEANING AND DISINFECTION?

The CDCP & American Journal of Infection Control highlight cleaning and disinfecting as **important parts of a comprehensive infection prevention strategy.**

## Cleaning

Removal of visible soils, food particles, and organic matter

## Disinfecting

Killing of microorganisms such as bacteria, yeasts, fungi, and viruses

## Infection Prevention Strategy

Reduces spread of microorganisms on treated surfaces

### Only cleaning is not enough

Cleaning removes dust, dirt, allergens\*, and grease but does not kill germs!

\*inanimate allergens from dust-mite matter, pet dander, cockroach matter

### Only disinfecting is not enough

Disinfections kill germs, but do not remove soils
