

HOTEL ODOR TREATMENT

Tools Needed

Product Needed

Febreze® Fabric Refresher

FREQUENCY OF CLEANING: After every occupancy.

SPECIAL DIRECTIONS FOR THIS TASK: For faster application, use the air pump sprayer.

GUEST BEDROOM NON-SMOKING ROOM ODOR TREATMENT STEP 1

- Lightly spray *Febreze* fabric refresher on draperies, bedspreads, furniture cushions, and carpet.
- When the fabric dries, odors disappear.
- For problem odors, use a little extra *Febreze* fabric refresher.

SMOKING ROOM ODOR TREATMENT STEP 1

- Spray *Febreze* fabric refresher on draperies, bedspreads, furniture cushions, and carpet until lightly damp.
- Spray air conditioner/heater intake vents (2-3 sprays) while the unit is running.
- Spray lamp shades (2-3 sprays).
- Spray unused bathroom towels (1-2 sprays).
- When the fabric dries, odors disappear.

LOBBY AND OFFICES STEP 1

- Lightly spray *Febreze* fabric refresher on furniture cushions, lamp shades, and carpet.
- When fabric dries, odors disappear.
- For problem odors, use a little extra *Febreze* fabric refresher.

NOTE: *Febreze fabric refresher eliminates odors trapped in fabrics. Febreze is not a perfume cover-up. As the fabric dries, fabric and Febreze odors disappear. The odors won't come back, leaving the fabric odor-free.*

NOTE: *Febreze is safe on virtually all fabrics. It does not yellow, tarnish or build up over time. Always test on a hidden area of fabric.*
