

# Floors – Damp Mop

## Products Needed

Spic and Span® Floor and Multi-Surface Cleaner

## Tools Needed

- Broom and Dust Pan
- Mop
- Mop Bucket
- Wet Floor Sign

## Frequency

Daily

## Special Directions

Change out the floor cleaning solution when it becomes dirty and after every use.

### Damp Mop

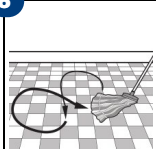

**1**  Sweep floor.

**2**  Put out the wet floor sign.

**3**  Fill mop bucket 4 gallons of water. Push the hand pump of Spic and Span Floor Multi Surface Cleaner into the mop bucket. Pump (2) full strokes, or 1/2 oz of product for every 1 gallon of water used.

**4**  Place mop head in solution and move mop up and down until the mop is soaking wet.

**5**  Place the mop head in the mop wringer and wring out as much solution as possible.

**6**  Mop a 10 foot by 10 foot area using a figure-8 motion and turning over mop at least twice.

**7**  Move to the next 10 foot by 10 foot area and repeat Steps 5 to 7 until this task is finished.

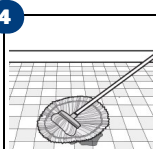

**5**  Damp mop the area to remove the loosened soil and cleaner residues using Steps 5 to 7 in the Damp Mop section of this procedure.

### Hardened Soil Removal

**1**  Place the mop head in the solution and move up and down until the mop is soaking wet.

**2**  Wet the hardened floor soil deposit and allow to soak 5 minutes.

**3**  Twirl mop head to open skirt to exposes the interior scouring pad and then drop the mop.

**4**  Scrub the area with the interior scouring pad to loosen the soil.

every experience counts.™
