

Testing Fit Anti-Bacterial Produce Wash Solution

Tools Needed

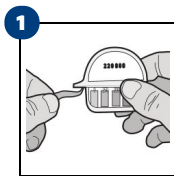

- Test Strips, 0.0 – 6.0 pH

Frequency

As Needed

Special Directions

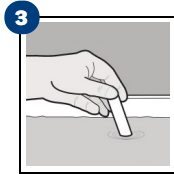

Wear appropriate gloves, if sensitive to cleaning solutions.

1 Tear off about a 1 inch strip of test paper.

2 Scoop a sample of the produce wash solution.

3 Immerse test strip in Fit solution for 1 second.

4 Match color to color chart and record pH of solution. Continue using solution, if **pH is 3.5 or less**.

every experience counts.™
